Experience

Student Researcher & Co-Author, 11/2024 - 01/2026
Algoverse - San Jose, CA

- Paper published, accepted, and presented at top AI/NLP international conferences (ACL & NeurIPS)
- Contributed to deception detection benchmark paper on DOLOS dataset, enhancing research community's understanding of deception detection methods
- Developed persistence through overcoming challenges in complex technical writing tasks

Solo & Ensemble Performer, 01/2013 - Current
California Conservatory of Music - Sunnyvale, California

- Performed 10+ recitals, 2-3 guitar ensembles yearly at churches & community centers for 100+ attendees
- Performed as opening act for guitarist Dieter Hennings at local venue
- Achieved completion of 9 levels in Suzuki Method, demonstrating proficiency in skills

Shadowing, 07/2025 - 07/2025
Agilent Technologies - Santa Clara, CA

- Shadowed an analytical engineer in GC-MS lab to learn techniques and processes
- Analyzed athlete samples using GC-MS to ensure accurate detection of substances, and supported integrity in sports

Music Assistant Volunteer, 06/2025 - 09/2025
The Music Place - Sunnyvale, CA

- Supported 20+ children with special needs in group music therapy, fostering social interaction and emotional expression
- Facilitated group activities and organized lessons/resources to enhance participant engagement through a custom app
- Assisted in organizing music lessons and schedules for students and instructors

Projects

"DecepBench: Benchmarking Multimodal Deception Detection": A benchmark research paper in affiliation with Algoverse AI Research based on the DOLOS dataset. Current approaches to deception detection are limited by the lack of generalizable and interpretable benchmarks built on diverse datasets. To address this gap, we introduced DecepBench, a comprehensive and robust benchmark for multimodal deception detection.
Melodix: A personal project app with 100+ users that allows children with special needs to create and interact with music through accessible interfaces like voice and digital music tools, which are enhanced with AI features to adapt to individual needs and provide personalized creative possibilities.
PANEless: An app to make healthcare services more accessible, affordable, and user-friendly by allowing users to easily track calories, manage diet, log sleep, improve mental health, and schedule appointments.
The Little Place: An app to educate the youth about the importance of climate change, mental health, and good nutrition by allowing the user to input data about their daily life and complete tasks to learn more about how to protect the environment.

Education

Expected in 06/2030 University of California, Los Angeles - Los Angeles, CA
Bachelor of Science Computer Science

06/2026 Stratford Preparatory Blackford High School - San Jose, CA
High School Diploma

- GPA: 4.0 / 4.0

Skills

- AI/ML Training & Development
- Data Science
- Data Analysis/Visualization
- Java, Python, C++, R, Swift
- Software Development
- Technical writing
- Music Composition & Performance
- Mentoring

Accomplishments

- Research: "DecepBench: Benchmarking Multimodal Deception Detection" accepted to international conferences ACL GEM, ACL SiCon, NeurIPS CogInterp, and MASC-SLL; sole presenter at ACL 2025 in Vienna, Austria
- Science Olympiad: 1st Place, Ecology and 3rd & 4th Place, Dynamic Planet at Boyceville Invitational
- The Girls Technovation Challenge (National): 2x Quarterfinalist in 2023 & 2024
